

ATHLETIXAI COMPLETE FLOW

From phone camera to measurable progress, coaching visibility and talent opportunity.

VIDEO-TO-INSIGHT ARCHITECTURE

Clear **TRUST RULE** Video never uploads. Only measured scores and report metadata cross from the browser to the API.

TECH STACK Vanilla JavaScript + MediaPipe Pose | Flask service layer | SQLite with Postgres migration path | Chart.js + jsPDF | Render + Unicorn | Installable PWA

QUALITY PRINCIPLE Insufficient movement data returns a retry - never a fabricated score. Best use: relative progress, not absolute certification.

SOURCE Flow mapped from the AthletixAI repository, README, service modules, API routes and production UI navigation.
